

PRACTICAL AI · 3 COURSES

Don't just learn AI. Build with it.

Three hands-on AI courses. 7 seats per batch, real projects, something working in every class.

WELCOME TO PRACTICAL AI

Learn it in class. Use it the **same week**.

Small, hands-on AI classes in Jogeshwari, Mumbai, taught by Shezad Ali Khan. Bring a laptop and a real problem. Leave with something that works.

Agents and responsible AI	14	Fees and how to join	15

WHY WE TEACH THIS WAY

Information is free. Implementation is the skill.

A video shows you the tool. A class makes it work for you.

**Build every session**

40% of every class is you, building.

**Skills over tools**

Tools change. The skill stays.

**Free tools first**

Paid plans only when worth it.

**No heavy maths**

Use, connect and ship.

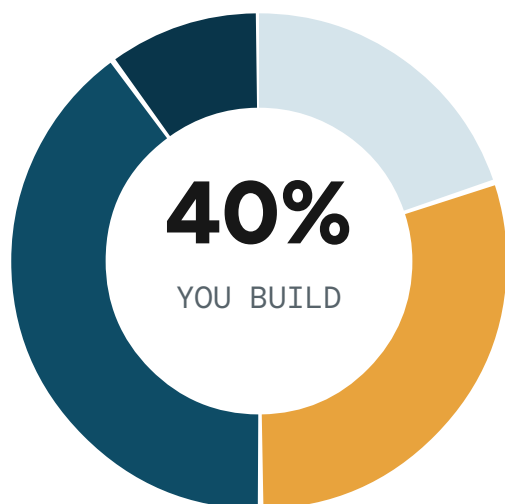

THE LEARNING JOURNEY

EVERY COURSE MOVES ALONG IT

**Understand****Use****Build****Automate****Agent**

HOW EVERY CLASS WORKS

In every class, you build.

ONE CLASS, 100%

20% Understand the idea

30% Watch it built live

40% Build it yourself

10% Fix and improve

EVERY TOPIC, FOUR STEPS

Understand

Watch

Build

Fix

INSIDE THE COURSE · AI PRACTITIONER

4 weeks. 6 labs. 6 things you keep.

THE LABS

6 LABS · 335 MIN

MODULE 2

Prompt library

Write and test 10 prompts you'll use every week. Save them as a reusable project.

50 min

Prompt library

MODULE 3

Research report

Find 3 checked sources, study them in Gemini Notebook, then make a 5-slide deck.

60 min

Report, deck, audio summary

MODULE 4

Weekly planner

Plan your real week: classes, deadlines, shifts.

45 min

Personal planner

MODULE 5

Poster and reel

A poster with clean text, an 8-second clip and a Hindi or English voiceover.

60 min

Poster, reel, voiceover

MODULE 6

Portfolio website

Describe your portfolio to Lovable, edit it, then publish it live.

60 min

Live website link

MODULE 7

3 personal agents

Design, test and refine study, research and career agents. Then try to break them.

60 min

3 working agents

Certificate from TNXN Solutions

Complete the course and its labs, and get a certificate from TNXN Solutions.

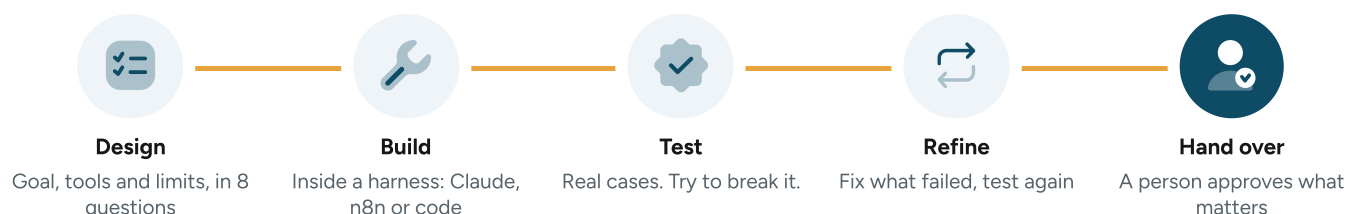

AGENTS AND RESPONSIBLE AI

Agents that work. Safely.

An agent is AI working inside a harness: an app that gives it tools, files and your approval.

THE AGENT LOOP

EVERY COURSE, AT ITS OWN LEVEL

FOUR RULES IN EVERY CLASS

**Check before you trust**

AI can be wrong. Verify facts and numbers.

**Keep data private**

Mask client data. Never paste Aadhaar or passwords.

**A human decides**

Money, people or public? A person approves.

**Respect people**

Label AI faces and voices. No copying.

EVERY COURSE HAS A RESPONSIBLE-AI MODULE

✓ AI Practitioner

✓ AI Professional

✓ AI Builder

Design any agent in 8 questions

Who is it?

What is its goal?

What does it know?

Which tools?

What does it remember?

What can it do alone?

What is off limits?

How do we check it?

AI can be wrong. You're the one who's accountable.

QUICK ANSWERS

Need coding?

Not for Practitioner or Professional.

When are classes?

Tue + Thu or Sat + Sun, 10 am – 1 pm.

Demo first?

Yes, a free orientation class.

Certificate?

Yes, from TNXN Solutions.

Bring your own laptop. Paid AI apps, if a lab needs one, are extra. We tell you before.
